New in Textar range: ABS Sensor Checker

Luxembourg, Leverkusen, December 2016. As a signal transmitter for brake pressure regulation the ABS sensor is an important part of the anti-lock braking system. With the help of a sensor ring the ABS sensor measures the wheel speed which is very important in terms of driving safety. Hence, in case of a defect fast fault diagnosis is advisable.

Textar now offers a practical ABS Sensor Checker for brake discs with a magnetic ABS sensor. Thus an easy and cost-efficient testing of the magnetic segments of the sensor is possible without complex diagnostic system. The testing device visualizes the magnetic fields and makes it easy to identify a defective ABS sensor ring.

For the implementation and for a limited period Textar attaches a free-of charge testing device to its brake discs with magnetic ABS sensor ring.

About TMD Friction

TMD Friction is one of the world's leading manufacturers of brake friction materials to the automotive and brake industry. The company's product portfolio comprises disc brake pads and drum brake linings for passenger cars and commercial vehicles together with friction materials for racing and industrial applications. With its brands Textar, Mintex, Don, Pagid and Cobreq, TMD Friction has a market-leading position in the global replacement parts market. Under the brand names Cosid and Dynotherm TMD Friction develops and produces friction materials for industrial applications. TMD Friction has four operations in Germany as well as in Europe, USA, Brazil, Mexico, China, Japan and South Africa. The TMD Friction Group employs approximately 4,800 people worldwide.
