TMD Friction: New Textar tools added to the range

Leverkusen/Frankfurt, 11th September 2018. Brake-pad specialist, TMD Friction, is expanding its range of tools so that repair shops can install brake components more quickly and reduce the potential for error when installing or removing parts. New products include among others, a brake disc measuring tool set, a digital micrometre as well as a cleaning set for wheel bolts. These new tools are available from dealers starting in October 2018. Tried and tested tools such as brake fluid testers, brake spring pliers or vacuum pumps will continue to be available as well. The new tool line-up can then be seen on the Textar Professional website (<https://textar-professional.com/portfolio-list/>).

TMD Friction is firmly committed not only to supplying repair shops and retailers with high-quality spare parts, but also to making it easier for them to handle the products, thus making their daily work easier. The refined range of tools extends the comprehensive service offered by the brake-pad specialist, which also includes training, checklists, tutorials as well as video tutorials. Detailed information on the offer can be seen on the Textar website.

“It is particularly important to us to offer repair shops the right tools that allow them to professionally install our modern brake components. The range of tools from Textar is specially tailored to the needs of repair shops and the installation and removal of brake parts, enabling safe, fast and error-free assembly,” explains Thomas Beier, Junior Product Manager at TMD Friction.
